

Learning outcomes	Additional guidance
<i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i> (a) drag as the frictional force experienced by an object travelling through a fluid (b) factors affecting drag for an object travelling through air (c) motion of objects falling in a uniform gravitational field in the presence of drag (d) (i) terminal velocity (ii) techniques and procedures used to determine terminal velocity in fluids.	PAG1 e.g. ball-bearing in a viscous liquid or cones in air. HSW4 Investigating factors affecting terminal velocity.
