

4.2.2 E.m.f. and p.d

Learning outcomes	Additional guidance
<i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i>	
(a) potential difference (p.d.); the unit <i>volt</i>	
(b) electromotive force (e.m.f.) of a source such as a cell or a power supply	
(c) distinction between e.m.f. and p.d. in terms of energy transfer	
(d) energy transfer; $W = VQ$; $W = \mathcal{E}Q$.	
(e) energy transfer $eV = \frac{1}{2}mv^2$ for electrons and other charged particles.
