

#### 4.2.5 Power

| Learning outcomes                                                                             | Additional guidance |
|-----------------------------------------------------------------------------------------------|---------------------|
| <i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i> |                     |
| <b>(a)</b> the equations $P = VI$ , $P = I^2 R$ and $P = \frac{V^2}{R}$                       | M2.2                |
| <b>(b)</b> energy transfer; $W = VI t$                                                        |                     |
| <b>(c)</b> the kilowatt-hour (kW h) as a unit of energy; calculating the cost of energy.      |                     |
