

6.1.1 Capacitors

Learning outcomes	Additional guidance
<i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i>	
(a) capacitance; $C = \frac{Q}{V}$; the unit farad	
(b) charging and discharging of a capacitor or capacitor plates with reference to the flow of electrons	
(c) total capacitance of two or more capacitors in series; $\frac{1}{C} = \frac{1}{C_1} + \frac{1}{C_2} + \dots$	
(d) total capacitance of two or more capacitors in parallel; $C = C_1 + C_2 + \dots$	
(e) (i) analysis of circuits containing capacitors, including resistors	
(ii) techniques and procedures used to investigate capacitors in both series and parallel combinations using ammeters and voltmeters.	PAG9
