

6.3.6 Teacher Observation Records

It is a requirement that a teacher completes the Teacher Observation Record **for unit R069** for each student as evidence of their professional pitch (TA3). The form is located on our secure website Teach Cambridge. The Teacher Observation Record should support evidence of a student delivering a professional presentation, alongside evidence such as the script, speaker notes, presentation slides or digital recordings/photographic evidence.

Teacher observation **cannot** be used as evidence of achievement for a whole unit. Most evidence should be produced directly by the student. Teacher observation should only be used where specified as an evidence requirement (For example, for the professional pitch in TA3 of unit R069).

Teacher Observation Records must be individual to each student and suitably detailed, to help moderators

determine if the grading criteria have been met. You must follow the guidance provided in the 'guidance notes' section of the form so that the evidence captured and submitted is appropriate. Both the student and the teacher must sign and date the form to show that you agree its contents. Electronic signatures are acceptable. The signed form must form part of the students' evidence and be submitted with work requested for moderation.

Where the guidance has not been followed, the reliability of the form as evidence may be called into question. If doubt about the validity of the Teacher Observation Record exists, it cannot be used as assessment evidence and marks based on it cannot be awarded. Moderators will be instructed to adjust centre marks accordingly.
