

## 2.2 Technical skills to create interactive digital media

### Product folder management

- Structure of the product folder
  - root, images, media content, styles
- File naming conventions

### Techniques to create

- Master page/template elements
  - house style
  - navigation system
  - fixed/editable content
- Master page/template
- Product content
- Playback controls
- Triggers and behaviours

### To include:

- Structuring product folders within creation software
- Using naming conventions to facilitate file management within product creation software

### Does not include:

- Structuring and naming of files unrelated to the product

### To include:

- Implementing effective house styles within master pages/templates e.g. colour scheme, font styles, layout, fixed content, editable content/regions
- Creating structures for navigation systems for interactive digital media e.g. navigation bar, buttons, rollovers, hyperlinks, hotspots
- Using master pages/templates within interactive digital media products to ensure consistent styling e.g. singular and multipage templates/master page used to create a set of stylised pages each conforming to the house style
- Inserting content into interactive digital media products e.g. text, images, tables, lists, sound, video, audio, maps, forms

## Unit R097: Interactive digital media

- Setting up playback controls within interactive digital media products e.g. navigation buttons, rollover buttons
- Setting up triggers and behaviours within interactive digital media products e.g. pop-up messages, drag and drop, scoring and reporting, user input, customised screen messages and feedback, closure
