

2b. Content of Computer systems (J276/01)

This component will introduce learners to the Central Processing Unit (CPU), computer memory and storage, wired and wireless networks, network topologies, system security and system software. It is expected that learners will become familiar with the impact of Computer Science in a global context

through the study of the ethical, legal, cultural and environmental concerns associated with Computer Science.

Learners may draw on some of this content when completing the Programming Project.
