

2c. Content of J205/01 – Introduction to Economics

This component introduces learners to the fundamental economic terms and concepts. Learners will apply these to investigate and explain how markets work in contemporary and historical economic contexts.

They will study the different roles and perspectives of the main economic agents (consumers, producers and the government) and how they interact in the economy.

Learners will develop the ability to use and interpret quantitative data to justify economic decisions.

They will learn to appreciate that all economic choices have costs and benefits. This will encourage them to consider moral, ethical and sustainability issues that arise as a result of the impact of economic activity in a range of national and global contexts.

Please note:

All terms in **bold** are key terms learners should be familiar with and learners should be able to explain their meaning. For the use and meaning of command words please see Section 2b.
