

5.01	Calculations with ratio				
5.01a	Equivalent ratios	Find the ratio of quantities in the form $a : b$ and simplify. Find the ratio of quantities in the form $1 : n$. e.g. $50 \text{ cm} : 1.5 \text{ m} = 50 : 150$ $= 1 : 3$			R4, R5

GCSE (9–1) content Ref.	Subject content	Initial learning for this qualification will enable learners to...	Foundation tier learners should also be able to...	Higher tier learners should additionally be able to...	DfE Ref.
5.01b	Division in a given ratio	Split a quantity into two parts given the ratio of the parts. e.g. £2.50 in the ratio 2 : 3 Express the division of a quantity into two parts as a ratio. Calculate one quantity from another, given the ratio of the two quantities.	Split a quantity into three or more parts given the ratio of the parts.		R5, R6
5.01c	Ratios and fractions	Interpret a ratio of two parts as a fraction of a whole. e.g. £9 split in the ratio 2 : 1 gives parts $\frac{2}{3} \times £9$ and $\frac{1}{3} \times £9$. <i>[see also Fractions of a quantity, 2.01c]</i>			N11, R5, R6, R8
5.01d	Solve ratio and proportion problems	Solve simple ratio and proportion problems. e.g. Adapt a recipe for 6 for 4 people. Understand the relationship between ratio and linear functions.			R5, R8
