

2c.1. Content of Physical factors affecting performance (J587/01)

Component 01, *Physical factors affecting performance*, introduces and explores some of the physical factors which underpin participation and performance in physical activities and sports.

Learners will start to explore the ways in which parts of the human body work and function during physical activity and the physiological adaptations that can occur due to diet and training. Learners will also develop their knowledge and understanding of the principles of training, why we train in different ways and how training plans can be made to optimise results.

The study of these topics will aid learners in the development of both their own practical performance and that of others.
