

9.2 Part 2: Visit or issue report

Students are expected to follow the conventions for the collection and presentation of data set out in the document issued by the Institute of Biology:

Biological Nomenclature — Standard Terms and Expressions Used in the Teaching of Biology, 3rd Edition (Institute of Biology, 2000) ISBN 0900490365, or visit www.iob.org.

Edexcel will issue centres with exemplar internal assessment material for *Unit 3, Part 2: Visit or issue report*, as part of the guidance for teachers.

Re-sit opportunities are available for Unit 3, students may carry forward verification of practical skills record and re-submit a new *Visit or Issue Report*.

Students will present a written report of between 1500 and 2000 words, which will be marked by the teacher and moderated by Edexcel or externally marked by Edexcel. The report may be a record of a visit to a site of biological interest, or a report of non-practical research into a biological topic. This need not be related to the specification content. The visit or issue addressed is intended to bring a student into contact with a 'real-life' example of biology in use. Students will be assessed on their ability to describe the biological-based methods and processes in the context of a selected problem or issue; identify the relevant applications of biology; use information or arguments from their research and communicate clearly. The visit or issue report also provides students with opportunities to demonstrate competence in key skills, both through the work they produce for their written report, and through other aspects of the work they carry out.

The report must be word processed and will be marked by the teacher or externally marked by Edexcel against the assessment criteria given below. HSW relates to *How Science Works* (see page 13). Centres requesting moderation of students' work will be required to submit marks and moderation sample by mid-May. Edexcel-marked reports will be required to be submitted to an examiner appointed by Edexcel by mid-May. Further guidance for submission of student work and marks will be published in the Edexcel Information Manual.

Work selected for moderation must be submitted electronically to Edexcel.
