

Topic 7B: Infrared (IR) spectroscopy
2. be able to use data from infrared spectra to deduce functional groups present in organic compounds and to predict infrared absorptions, given wavenumber data, due to familiar functional groups, including: - i C–H stretching absorption in alkanes, alkenes and aldehydes - ii C=C stretching absorption in alkenes - iii O–H stretching absorption in alcohols - iv C=O stretching absorption in aldehydes and ketones - v C=O stretching absorption and the broad O–H stretching absorption in carboxylic acids - vi N–H stretching absorption in amines
CORE PRACTICAL 7: Analysis of some inorganic and organic unknowns
