

2 Centres of mass of plane figures	2.1	Moment of a force. Centre of mass of a discrete mass distribution in one and two dimensions.	
	2.2	Centre of mass of uniform plane figures, and of composite plane figures. Centre of mass of frameworks. Equilibrium of a plane lamina or framework under the action of coplanar forces.	The use of an axis of symmetry will be acceptable where appropriate. Use of integration is not required. Questions may involve non-uniform composite plane figures/frameworks. Figures may include the shapes referred to in the formulae book. Unless otherwise stated in the question, results given in the formulae book may be quoted without proof.
