

6 Recurrence relations	6.1	Use of recurrence relations to model appropriate problems.	
	6.2	Solution of first and second order linear homogeneous and non-homogeneous recurrence relations.	Students should be able to solve relations such as, $u_{n+1} - 5u_n = 8, u_1 = 1$ $2u_{n+2} + 7u_{n+1} - 15u_n = 6, u_1 = 10, u_2 = -17$ The terms, particular solution, complementary function and auxiliary equation should be known. Use of recurrence relations to model applications e.g. population growth
