| <p><b>3.5</b> The scale and pace of economic migration has increased as the world has become more interconnected, creating consequences for people and the physical environment.</p> | <p>a. Rural-urban migration (push and pull factors), and/or natural increase, is responsible for the growth of megacities (🌐 Mumbai or Karachi); rapid urban growth creates social and environmental challenges. (5)</p> <p>b. International migration has increased in global hub cities and regions, deepening interdependence between regions (high-wage economic migration to 🌐 Singapore and London and low-wage economic migration to 🌐 UAE and Saudi Arabia).</p> <p>c. Migration has economic, social, political and environmental costs and benefits for both host and source locations.</p> |
