
Paper 3, Option 32:

The Golden Age of Spain, 1474–1598

Overview

This option comprises two parts: the *Aspects in breadth* focus on long-term changes and contextualise the *Aspects in depth*, which focus in detail on key episodes.

Together, the breadth and depth topics explore key events and developments in Spanish history at a time when Spain exercised a major influence on Europe as a whole and became what can possibly be described as the first truly world power. Within the primarily political focus on events within Spain and Spanish influence abroad, this option also gives students the opportunity to explore social and economic dimensions and the part they played in generating pressure for change.
