

5.7 Specialist techniques, tools, equipment and processes that can be used to shape, fabricate, construct and assemble a high-quality systems prototype	Application, advantages and disadvantages, of the following specialist techniques when manufacturing products, in order to be able to discriminate between them and select appropriately for use.
	5.7.1 Tools and equipment: - a hand tools - b machinery - c digital design and manufacture.
	5.7.2 Shaping: - a vacuum forming - b CNC laser cutting - c 3D printing - d drilling.
	5.7.3 Fabricating/constructing/assembling: - a PCB mounting methods – through hole, surface mount - b cable management – looms, sleeving, ties - c wastage - d addition.

SYSTEMS
