

5.8 There are positive and negative impacts of rapid development for the people and environment of the chosen developing or emerging country	a. Positive and negative social, economic and environmental impacts of rapid development for the chosen country and its people.
	b. How the chosen country's government and people are managing the impacts of its rapid development to improve quality of life and its global status.

Integrated skills:

- (1) Comparing the relative ranking of countries using single versus composite development measures
- (2) Interpreting choropleth maps
- (3) Using numerical economic data to profile the chosen country
- (4) Using proportional flow line maps to visualize trade patterns and flows
- (5) Interpreting population pyramids
- (6) Using socio-economic data to calculate difference from the mean, for core and periphery regions.
