

Component 2: Composing

Overview

The purpose of this component is to assess students' skills in composing music and enables them to appreciate the process of creating music. Students will be introduced to the technical and creative skills required by a composer.

Composing is the creative process by which most of the music we experience came into being. Students will be encouraged to explore a range of compositional starting points and investigate a range of elements, techniques and resources for developing and manipulating ideas – and turning them into completed pieces of music.

Students can also explore the skills needed to compose music for different instrumental and/or vocal forces.

Students must submit two compositions, of a combined duration of at least three minutes:

- one in response to a brief set by Pearson, of at least one minute in duration
- one free composition set by the student, of at least one minute in duration
- students do not have to perform the music that they have composed.

Content

Students should be given a wide range of opportunities to develop their composition skills. Students should take into account the effect of the purpose and intention of their pieces of music, and the effect of audience, time and place when composing their pieces.

Students will be required to demonstrate the ability to:

- make use of musical elements, techniques and resources to create and develop musical ideas with technical control and coherence; freely as the composer chooses, and responding to a brief or commission supplied by others
- compose music that develops musical ideas, uses conventions, and explores the potential of musical structures and resources.

The composition skills to study include:

- Developing musical ideas:
 - developing musical ideas in the form of compositions and/or arrangements.
- Compositional techniques and strategies:
 - how to write for instrument(s) and/or voice(s) and/or technology: efficient, sensitive and idiomatic handling of appropriate timbres and textures
 - how to develop musical ideas within chosen forms and structures: understanding the principles of rhythmic, melodic and harmonic construction and the working of form(s) and structure(s) appropriate to the composition undertaken.
- Ensuring technical control and coherence:
 - working to a set brief: developing the necessary technical skills to meet the requirements of the brief and relating it to its intended audience and occasion.
- Methods of notating composition scores, including:
 - staff notation
 - graphic notation
 - written accounts.

In order to compose in a particular style or genre, it is essential to study examples of music in some detail. This will enable students to recognise and use appropriate musical vocabulary, chord symbols and rhythmic notation relevant to their compositions. Much of the listening and appraising work will involve analysis of the set works and these could be used as models for composing in those particular forms and styles.

Composing using music technology

Students may compose their pieces of music using music technology. This may involve the use of a Digital Audio Workstation (DAW) to compose, edit and process sequenced compositions using live recordings, audio samples and MIDI materials. It may also involve the use of synthesisers, virtual instruments and amplified instruments, such as guitars using pedals (including loop pedals) and other processors.

Musical elements

Depending on the choice of instrument(s) and/or voice(s), and the composition, students should use the appropriate musical elements in their composition.

The musical elements are listed below:

- organisation of pitch
- tonality
- structure
- sonority
- texture
- tempo, metre and rhythm
- dynamics.

Musical contexts

Students should take into account the effect of the purpose and intention of their composition, and the effect of audience, time and place when composing their pieces. Students should compose their music with control, expressing the music as appropriate to its style and mood.

Musical language

Depending on the choice of instrument(s) and/or voice(s), and the composition, students should be able to compose music using the appropriate musical language.

The different types of musical language are listed below:

- reading and writing of staff notation
- major and minor chords and associated chord symbols
- recognising and accurately using appropriate musical vocabulary and terminology related to the areas of study.

The composition briefs

Briefs will be released on the 1st of September for assessment in the following exam series. The briefs will relate to each of the areas of study. The general themes of the briefs are listed below. Each brief will relate to a specific audience and/or occasion. Students must compose to their chosen brief based on one of the areas of study.

The composition may be for any instrument or voice, or combination of instruments and/or voices, and in any style, subject to the requirements of the selected composition brief.

Brief 1 – Instrumental Music 1700-1820

Students should study instrumental forms which facilitate the development and extension of an opening melody such as binary form, ternary, rondo, theme and variations and fantasia. They should practise harmonising and developing given melodies using the techniques of repetition, variation, extension and motivic working to sustain a piece with a varied and creative musical outcome.

Students may work in any style, subject to the brief.

Students will be required to develop a given melodic phrase into a piece for one instrument and accompaniment.

Brief 2 – Vocal Music

Students should investigate the relationship between the structure of vocal pieces and the structure of texts by studying a variety of song forms (for example da capo, strophic, verse/chorus) and word settings. They should investigate the handling of instrumental accompaniments and/or backings.

Students may work in any style, subject to the brief.

Students will be required to set words to music for voice and accompaniment.

Brief 3 – Music for Stage and Screen

Students should study the techniques of underscoring moving images and composing incidental music for the stage to produce a satisfying and flowing succession of musical moods and atmospheres. They should learn how to enhance visual or dramatic action in which the narrative and sequencing may not follow conventional forms and structures. If they choose to compose a show song they should learn how music, lyrics, and if appropriate, dance, combine to produce a theatrical result.

Students may work in any style, subject to the brief.

Students will be required to compose a musical soundtrack in response to a given scenario.

Brief 4 – Fusions

Students should learn how harmony, melody, rhythm and instrumentation combine to create a characteristic stylistic 'feel' in the music. They should gain practice in the handling of these elements to create music in a range of styles and stylistic influences.

Students will be required to compose a piece based on two set musical styles or traditions.

The composition briefs will make compositional demands in terms of the treatment of ideas, techniques and structures but between them will be sufficiently open-ended to allow students the freedom to work in any style or genre or for any instrument.

Students should be aware of the specific assessment criteria against which the compositions will be marked.

Free composition

Students will produce one composition that is free, i.e. not related to a set brief. They should use their imagination and skills to compose a piece of music. They can draw inspiration or starting points from the set works and suggested wider listening, as well as their own interests and the world around them. They should consider the role of the audience and/or occasion in their composition.

The piece composed by the students may be for any instrument or voice, or combination of instruments and/or voices, and in any style.

Assessment information

- First assessment: 2018.
- This component consists of 60 marks.
- Students must submit two compositions, of a combined duration of at least three minutes. One in response to a brief set by Pearson, of at least one minute in duration, and one free composition set by the student, of at least one minute in duration.
- For compositions that **do not** meet the total minimum time requirement, the total composition mark will be reduced proportionally according to how many seconds the combined composition is less than three minutes. This will be applied by Pearson during the moderation process. Please see *Appendix 9: Mark penalty tables for submissions not meeting the minimum assessment time*.
- Four briefs will be published on the Pearson website on the 1st September each year, from September 2017.
- The composing may take place over multiple sessions.
- Compositions must be submitted at the end of the course by 15 May.
- Centres must ensure that compositions submitted are valid for the series in which they are submitted.
- Students must complete a minimum of five hours of their composing, including the final write-up and recording, in a classroom setting under teacher supervision
- Students do not have to perform the pieces of music that they have composed.

Composition task setting, taking and assessment

Task setting

Students should choose the composition brief from those released by Pearson each year, and decide their free composition with the support of their teacher.

Group compositions where the music is the work of more than one student are not acceptable.

Each composition must be at least one minute in duration. The two compositions combined should be a minimum of at least three minutes in duration.

Set brief compositions must be worked on and assessed in the academic year in which the student expects to be awarded the qualification. Free compositions can be worked on at any point, but must be recorded and assessed in the academic year in which the student expects to be awarded the qualification.

Guided maximum composition times

There is no maximum time limit to students' combined composition. Excessively long submissions may be self-penalising.

The guided maximum time for the combined composition (both set brief and free composition) is five minutes. Compositions exceeding the maximum time will still be marked.

Task taking

Students must submit two compositions, of a combined duration of at least three minutes:

- one in response to a brief set by Pearson, of at least one minute in duration
- one free composition set by the student, of at least one minute in duration.

Collaboration

Students may work together on their research but group compositions are not allowed.

While research and development may be carried out by the student in or out of the centre, the final composition and score or account must be completed in the centre under teacher supervision.

Controlled conditions

Students must work on their compositions under controlled conditions for at least five hours. This must include the final write-up of their compositions, and can include any research and development time. The final write-up is defined as the time when the final recording and score or commentary of the piece is produced.

As composition is a creative process that cannot be confined to the classroom, students will be allowed to research and generate initial ideas outside of the classroom and teacher supervision. However to ensure the composition is the student's own unaided, personal and independent work, teachers must monitor and authenticate preparatory work (development of composition ideas, for example this may involve listening to other music, mulling over a brief, experimenting with suitable melodies or rhythmic ideas on guitar or piano, working out rough drafts) prior to the commencement of the composition recording period. Students will be allowed to bring in stimulus and ideas but need to develop ideas within a classroom setting and complete the final recording and write-up under controlled conditions.

Teachers should inspect the preparatory material, and be satisfied that they are the student's own work, checking them against the student's previous work and expectations of them.

Teacher guidance during this period must be restricted to: the availability and suitability of sources and materials, the prevention of plagiarism and ensuring the work is conducted in accordance with specification requirements and procedures.

Feedback

Teachers may help students to understand rubrics, assessment criteria and controls.

Teachers must not provide students with solutions. Any additional feedback must be recorded on the Composition Authentication Sheet, please see *Appendix 2*.

Resources

Students must have equal access to IT resources. Students should have access to a range of resources/interpretations/texts to enable them to make choices as required for their tasks.

Composition recording

Recording the composition

Compositions and arrangements may be realised through conventional instruments or music technology. The quality of the recording of the performance will not be assessed. Only the actual composition itself will be assessed.

Items for submission for moderation

1. Score

A detailed notated score appropriate to the style of music must be submitted for each composition. This can be submitted on manuscript paper or as a printout. The score may be handwritten or printed. This must be produced by the student.

'Score' refers to any of the following: a full score in conventional staff notation; a lead sheet or chord chart; track sheets; written account, tables or diagrams.

The purpose of the score is to justify the intentions of the piece of music that has been composed, so that it may be easily replicated by another performer. It should include all necessary and appropriate musical vocabulary.

Students not enclosing a traditional notation score must submit a written account instead (no more than 500 words). This piece of writing should give a detailed description of the composition and its purpose and meaning. It should refer to the musical content throughout.

Written accounts must contain similar information to that found in a score: details of performance indications and the composer's intentions, including the appropriate and necessary musical vocabulary. A good account containing sufficient information for a realisation of the composer's intentions is acceptable for any style of music.

Whatever format or combination of formats is chosen, the presentation must be sufficiently clear and detailed enough for the moderator to be able to assess the composition or arrangement.

The recording and the score will be used together to assess the composition. The presentation of the score will not carry marks, but students should ensure that it is of sufficient clarity to be read and understood by a third party.

2. Recording

A complete recording of both pieces must be submitted via the online submission platform LWT. Each composition for each student should be a separate track, individually labelled with their centre number, candidate number and composition title. The recording can be made live or be studio-produced.

3. Composition Authentication Sheet

The Composition Authentication Sheet (CAS) must be completed by the teacher, and signed by the student and teacher, authenticating that the work is the student's own. Please see *Appendix 2*.

4. Submissions not meeting minimum time requirement

The combined composition time of both compositions must be at least three minutes.

Students submitting combined compositions of less than three minutes in length should be marked against the assessment criteria on the following pages.

Centres will be required to notify us of any students who do not meet the minimum time requirement of three minutes.

For compositions that do not meet the minimum time requirement, the total composition mark will be reduced proportionally according to how many seconds the combined composition time is less than three minutes. This will be applied by Pearson during the moderation process. Please see *Appendix 9: Mark penalty tables for submissions not meeting the minimum assessment time*.

If, during the moderation process, inaccuracies in the composition times are discovered, the moderator may request the rest of the cohort to verify the correct timings.

Failure to accurately record the composition times may result in staff/centre malpractice. For further information about this, please see the *Administration and general information* section in this specification.

Gaps between pieces and tuning **do not** count towards the composition time.

Marking, standardisation and moderation

Teachers should mark the assignment using the assessment criteria on the following pages. Teachers may annotate students' work but should also include any comments on the Composition Authentication Sheet to justify the marks awarded.

Where marking has been carried out by more than one teacher in a centre, there must be a process of internal standardisation carried out to ensure that there is a consistent application of the assessment criteria.

Marks awarded by the centre will be subject to external moderation by Pearson. Moderation will ensure consistency with national standards. Pearson will notify centres of the students whose work has been selected for moderation. This sample will take cohort size into account.

If the moderation indicates that centre assessment does not reflect national standards, an adjustment will be made to students' final marks to compensate.

For up-to-date advice on teacher involvement and administration of non-examination assessments, please refer to the Joint Council for Qualifications (JCQ) document *Instructions for conducting non-examination assessments (new GCE and GCSE specifications)* available on the JCQ website: www.jcq.org.uk

Composition assessment criteria

Teachers must mark students' compositions using the three assessment criteria grids on the following pages to give a mark out of 30.

These criteria have been developed to assess students' skills in developing musical ideas, demonstrating technical control and composing with musical coherence. They are to be used to assess both the Pearson set brief and free composition.

Where the word 'instrument' is mentioned this includes voice.

For the composition being assessed, teachers should use their professional judgement to establish in which level of quality of the music composed is.

The compositions are equally weighted and will be marked equally, even if the two compositions are of significantly different lengths.

Teachers should mark the compositions against each grid in order to get a total mark out of 30 for each composition (Pearson set brief and free composition). The totals from each composition piece should be added together to give the total marks for this component out of 60.

Composition assessment grid 1: Developing musical ideas

These marks are awarded for the development of musical ideas and use of musical elements as appropriate, the management of stylistic characteristics and conventions, and the response to the brief if appropriate, and the effectiveness with which the piece meets its intended purpose and/or audience.

Level	Mark	Developing musical ideas
	0	No rewardable material
Level 1	1–2	• Musical ideas are limited, undeveloped and have little relevance to the intended purpose and/or audience. • Characteristics and conventions for the chosen genre/style have not been observed or are seriously misjudged. • For brief-set composition only: unimaginative and inappropriate response to the brief.
Level 2	3–4	• Musical ideas are somewhat developed, with some relevance to the intended purpose and/or audience, but with some obtrusive misjudgements that compromise the effectiveness of the piece. • There is an attempt to develop and manage appropriate stylistic characteristics and conventions for the chosen genre/style but these are unconvincing for the most part and maintained inconsistently. • For brief-set composition only: the piece meets the brief in some respects but lacks sophistication and/or detail.
Level 3	5–6	• Musical ideas are developed and extended, with relevance to the intended purpose and/or audience but there are one or two obvious misjudgements and/or inconsistencies. • Stylistic characteristics and conventions for the chosen genre/style have been selected appropriately and are maintained inconsistently in parts but misjudgements do not detract seriously from the overall impression. • For brief-set composition only: the piece meets the brief and its intended audience and occasion although the approach is perhaps a little functional.

Level	Mark	Developing musical ideas
Level 4	7–8	• Musical ideas are developed and extended effectively, with good relevance to the intended purpose and/or audience for the most part. • Stylistic characteristics and conventions for the chosen genre/style have been selected appropriately and maintained convincingly for some of the piece despite one or two minor misjudgements. • For brief-set composition only: creative response to the brief with some sense of audience and occasion.
Level 5	9–10	• Musical ideas are developed and extended successfully and with assurance, meeting the intended purpose and/or audience appropriately. • Stylistic characteristics and conventions for the chosen genre/style have been selected appropriately and handled convincingly throughout. • For brief-set composition only: imaginative response to the brief with a well-developed sense of audience and occasion.

Composition assessment grid 2: Demonstrating technical control

These marks are awarded for control of the appropriate musical elements, of devices and conventions appropriate to the chosen style and/or genre, and of the control of the chosen instrument(s).

Level	Mark	Demonstrating technical control
	0	No rewardable material
Level 1	1–2	• The control of appropriate musical elements is insecure, with many obtrusive misjudgements that seriously compromise the effectiveness of the piece. • The instrumental and/or vocal forces are handled un-idiomatically, possibly with passages that cannot be played/sung. • Textures are narrow in scope and unvaried.
Level 2	3–4	• The control of appropriate musical elements is insecure and marred by obvious and/or frequent misjudgements. • The handling of instrumental and/or vocal forces is functional and basic although the parts are mainly playable/singable. • The handling of textures may be misjudged and/or unvaried.
Level 3	5–6	• The control of appropriate musical elements is mostly secure although there may be some obvious inconsistencies and/or misjudgements. • There is some attempt to write idiomatically for the instrumental and/or vocal forces but they may lack exploitation in parts. • There are no serious misjudgements in the handling of textures but they may lack variety.
Level 4	7–8	• The control of appropriate musical elements is secure, and any misjudgements are not enough to have a serious impact on the success of the piece. • The instrumental and/or vocal forces show some contrast and exploitation. • Textures are varied and clear as appropriate to the style.

Level	Mark	Demonstrating technical control
Level 5	9–10	• The control of appropriate musical elements is secure throughout, and any misjudgements are marginal and few, if any. • The instrumental and/or vocal forces are handled idiomatically and exploited imaginatively. • Textures are varied, complex, and/or clear as appropriate to the style.

Composition assessment grid 3: Composing with musical coherence

These marks are awarded for the use and combination of appropriate musical elements to achieve musical coherence and fluency.

Level	Mark	Composing with musical coherence
	0	No rewardable material
Level 1	1–2	• Little sense of structure, design or balance between the sections. • Limited sense of fluency or contrast in the piece. • The piece may be incomplete or missing significant passages.
Level 2	3–4	• An attempt at basic, balanced structures but perhaps repetitive, predictable or showing too great a diversity of ideas. • Fluency and contrast will be attempted but unconvincing in parts. • There are attempts made at achieving a sense of direction in the piece.
Level 3	5–6	• The piece demonstrates a satisfactory use of basic structures but these may be formulaic or standard forms. • Fluency and contrast will be maintained for the most part. • There is a sense of direction in the piece.
Level 4	7–8	• The piece demonstrates some sense of wholeness and balance between the sections. • There is good sense of fluency and contrast. • There is a good sense of direction overall.
Level 5	9–10	• A sense of coherence and wholeness is achieved throughout. • There is a consistent sense of fluency and contrast throughout. • There is a convincing sense of direction overall.

Security and backups

It is the centre's responsibility to ensure that the composition briefs are kept secure until released to students.

It is also the centre's responsibility to keep the work that students have submitted for assessment secure. Secure storage is defined as a securely-locked cabinet or cupboard.

The rules on storage also apply to electronic data. For example, centres should collect memory sticks for secure storage between sessions or restrict student access to specific areas of the centre's IT network.

For materials stored electronically, centres are strongly advised to utilise firewall protection and virus-checking software, and to employ an effective backup strategy, so that an up-to-date archive of students' evidence is maintained.

Further information

For up-to-date advice on teacher involvement and administration of non-examination assessments, please refer to the Joint Council for Qualifications (JCQ) document *Instructions for conducting non-examination assessments (new GCE and GCSE specifications)* available on the JCQ website: www.jcq.org.uk

Component 3: Appraising

Overview

The purpose of this component is to assess students' listening and appraising skills through the study of music across a variety of styles and genres. The content is grouped into four areas of study, each of which contains two set works.

This component gives students the opportunity to reflect on, analyse and evaluate music in aural and/or written form. To achieve these objectives students need to use their knowledge and understanding of musical elements, musical contexts and musical language to make critical judgements about the repertoire and context of music within the areas of study. These critical judgements will require the use of attentive listening, aural perception and specific music vocabulary associated with a particular style or genre. These areas of study also provide opportunities for students to demonstrate their contextual understanding of music when performing and composing.

Students will learn the content of musical elements, musical contexts and musical language through four compulsory areas of study. The areas of study and set works are:

Area of study	Set works
Instrumental Music 1700–1820	• J S Bach: 3rd Movement from Brandenburg Concerto no. 5 in D major • L van Beethoven: 1st Movement from Piano Sonata no. 8 in C minor 'Pathétique'
Vocal Music	• H Purcell: Music for a While • Queen: Killer Queen (from the album 'Sheer Heart Attack')
Music for Stage and Screen	• S Schwartz: Defying Gravity (from the album of the cast recording of Wicked) • J Williams: Main title/rebel blockade runner (from the soundtrack to Star Wars Episode IV: A New Hope)
Fusions	• Afro Celt Sound System: Release (from the album 'Volume 2: Release') • Esperanza Spalding: Samba Em Preludio (from the album 'Esperanza')

There are two set works in each area of study, and these will allow students to develop their knowledge and understanding of musical elements, musical contexts and musical language through the context of these pieces. Students should also study a range of pieces beyond these set works. The suggested wider listening pieces for each area of study (see *Appendix 4: Suggested wider listening*) provide students with breadth, enabling them to place their knowledge of musical elements, musical contexts and musical language in a wider context, and apply their knowledge and understanding to more pieces of music. The suggested wider listening will help students to relate their learning to other pieces of music, but its study is not compulsory. Teachers can identify and teach other pieces of music to support their students' learning.

Content

Knowledge and understanding

Students need to learn about the following in order to critically appraise pieces of music through the contexts of areas of study:

- form and structure of the music
- appropriate musical vocabulary for each work
- stylistic features of the music, for example the Baroque features to be found in the music
- conventions used in different times and places
- how music relates to the context in which it was created
- how to express and justify their opinions and preferences.

Students need to demonstrate their knowledge and understanding of musical elements, musical contexts and musical language in relation to music that they have studied and to unfamiliar music for each of the areas of study.

Musical elements

This includes:

- organisation of pitch (melodically and harmonically), including simple chord progressions, for example perfect and imperfect cadences, and basic melodic devices
- tonality, including major, minor and basic modulations within the music, for example tonic, dominant
- structure; organisation of musical material, including simple structure, for example verse and chorus, call and response, binary and theme and variations
- sonority, including recognition of a range of instrumental and vocal timbres and articulation, for example legato and staccato
- texture, how musical lines (parts) fit together, including simple textural combinations, for example unison, chordal and solo
- tempo, metre and rhythm, including pulse, simple time, compound time, and basic rhythmic devices, for example dotted rhythms
- dynamics; basic dynamic devices, for example crescendo and diminuendo.

These musical elements can be applied to many different types of music but may not be applicable to every single area of study or set work to the same degree or extent.

The use of the musical elements above should be used to understand how, as appropriate to each area of study and set work:

- to identify how instrumentation is used in different combinations (identifying instruments and groups of instruments)
- the instrumentation is used to good effect, including playing techniques etc associated with a particular instrument or group
- to identify musical and melodic devices (ornamentation, ostinati, riffs, use of imitation, pedal point and sequence)
- to identify rhythmic devices and features (syncopation, swung rhythms, dotted rhythms and triplets)
- to identify and discriminate between major, minor, modal, pentatonic, and chromatic tonalities
- texture is used, including how the music exploits textural contrasts with reference to monophony, homophony, polyphony, heterophony etc
- musical devices are used, such as ostinato/riff, sequence, repetition, pedals and drones
- harmony and chord patterns are used in the music
- the effects of music (e.g wah wah, flanger, continuo – see Appendix 3 for more examples).

Musical contexts

This includes:

- the effect of purpose and intention (for example of the composer, performer, commissioner) on how music is created, developed and performed in different historical, social and cultural contexts
- the effect of audience, time and place (for example venue, occasion) on how music is created, developed and performed in different historical, social and cultural contexts.

Musical language

This includes:

- reading and writing of staff notation, including treble-clef and bass-clef note names, rhythmic notation in simple time, key signatures to four sharps and four flats
- major and minor chords and associated chord symbols, including traditional and contemporary notation as appropriate, for example IV or G7
- recognising and accurately using appropriate musical vocabulary and terminology related to the areas of study, for example slide, repeats and stepwise
- recognising and accurately using appropriate terminology related to scores (e.g. continuo)

Students should have an understanding of key stylistic features and be able to use appropriate music language and terminology in their answers. For example, students should be able to describe a repetitive melody in a classical piece as an 'ostinato' but also to use the correct term of 'riff' when describing the same feature in a piece of popular music. When describing musical textures, the description of 'thick' or 'thin' is not appropriate in the description of a homophonic or polyphonic passage. Students should understand the appropriate and correct musical vocabulary to use when appraising each of the set works.

The Music vocabulary list in *Appendix 3* lists vocabulary and terminology that supports the learning of musical elements, musical contexts and musical language. The list indicates the level and scope of technical language expected from students at this level. The list is not exhaustive. The words listed may appear in the examination paper and should be used in students' answers where appropriate.

Some of the study of the set works will also involve identifying key musical themes, chord patterns and rhythms. Examination questions every year will feature musical dictation which could be completing some notes on staff notation/guitar tablature, or identifying a particular rhythm or completing a chord sequence. It is, therefore, important that students study the various types of notation used in the eight set works.

Areas of study

Students will learn the musical elements, musical contexts and musical language in depth through four compulsory areas of study.

The areas of study are:

- Instrumental Music 1700–1820
- Vocal Music
- Music for Stage and Screen
- Fusions.

These areas of study enable students' listening and appraising to understand music across a variety of styles and genres. Each area of study includes two set works that should be studied in detail.

These set works will enable students to develop their knowledge and understanding of musical elements, musical contexts and musical language in depth, and within the context of the area of study. Teachers should enable students to draw connections and links between the set works within each area of study and also explore the connections with the other areas of study.

For each area of study, students are expected to use appropriate terminology and vocabulary associated with the genres, styles and features of the area of study.

Examples of the words expected to be known and understood by students for use in the examination are found in *Appendix 3: Music Vocabulary List* on page 64.
