

9.2 The level of development and human welfare varies globally and has had a range of consequences	a) Global pattern of the uneven development between and within countries and the factors (social, historic and economic) that have led to these spatial variations. b) Impact of uneven development on welfare and quality of life within one named country 🌐: poverty, unemployment, inadequate housing and physical infrastructure. (3) c) How countries at different levels of development have differences in their demographic data (fertility rates, death rates, natural increase, population structures, maternal and infant mortality rates). (4) and (5)
