

5. Matrix algebra integration		
5.1	Addition and subtraction of matrices.	
5.2	Multiplication of a matrix by a scalar.	
5.3	Products of matrices.	
5.4	Evaluation of 2×2 determinants.	Singular and non-singular matrices.
5.5	Inverse of 2×2 matrices.	Use of the relation $(\mathbf{AB})^{-1} = \mathbf{B}^{-1}\mathbf{A}^{-1}$.
