

**Topic 12: Matter – Pure substances and mixtures**

| Students should: |                                                                                                            | Guidance<br><i>iLowerSecondary Curriculum reference</i>                                                                                                               |
|------------------|------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 12.1             | know the difference between a pure substance and a mixture                                                 | for example, water is pure if it contains only water molecules, sugar water is a mixture<br><br><i>Year 7: Matter – Pure substances and mixtures</i>                  |
| 12.2             | know what is meant by the terms <i>solvent, solute, solution, saturated solution</i> and <i>suspension</i> | use making solutions for a simple introduction to principle of Conservation of Mass, to be built on later<br><br><i>Year 7: Matter – Pure substances and mixtures</i> |
