

Topic 19: Earth and atmosphere – Materials made from substances in the Earth

Students should:		Guidance <i>iLowerSecondary Curriculum reference</i>
19.1	know the names of some common polymers and ceramic materials and their properties	for example, the polymers: - poly(ethene) - poly(chloroethene) (PVC) - rubber. the ceramics: - porcelain - pottery - glass. <i>Year 9: Earth and atmosphere – Materials made from substances in the Earth</i>
19.2	know how uses of some common polymers and ceramic materials are related to their properties	students are NOT expected to remember the properties of specific materials <i>Year 9: Earth and atmosphere – Materials made from substances in the Earth</i>
19.3	understand that composite materials are made by combining two or more materials and that they have some of the properties of each	<i>Year 9: Earth and atmosphere – Materials made from substances in the Earth</i>
19.4	know the names of some composite materials and relate their properties to their uses	for example, reinforced concrete, MDF and GRP <i>Year 9: Earth and atmosphere – Materials made from substances in the Earth</i>
19.5	understand that making and using some materials can cause environmental problems and appreciate ways of reducing them, including recycling	for example, plastics <i>Year 9: Earth and atmosphere – Materials made from substances in the Earth</i>
19.6	understand the term <i>biodegradable</i>	<i>Year 9: Earth and atmosphere – Materials made from substances in the Earth</i>
