

### 3.2 Angles

| Subject content                                                                                                                                   | Guidance                                                                                    | Curriculum reference                      |
|---------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|-------------------------------------------|
| <b>A</b> Describe and name acute, obtuse and reflex angles                                                                                        |                                                                                             | G7.2A                                     |
| <b>B</b> Measure, draw and estimate angles                                                                                                        | Use a protractor                                                                            | G7.2B                                     |
| <b>C</b> Know and use the sum of angles at a point, on a straight line, in a triangle and quadrilateral, and recognise vertically opposite angles |                                                                                             | G7.2C<br>G7.2D<br>G7.2E<br>G7.3C<br>G7.3F |
| <b>D</b> Describe, identify and use properties of quadrilaterals, including their angle, sides, diagonals and symmetry                            | Square, rectangle, parallelogram, rhombus, trapezium, kite                                  | G7.2E<br>G7.3B<br>G7.3F<br>G8.2A          |
| <b>E</b> Calculate the sum of the interior and exterior angles of an irregular or regular polygon                                                 | What is the total number of degrees of the internal angles of an irregular/regular decagon? | G7.2E<br>G7.3F<br>G8.2B                   |
| <b>F</b> Calculate the interior and exterior angles of an irregular or regular polygon                                                            | Calculate the missing angle in any polygon, given all other angles but not angle sum        | G7.3D<br>G7.2E<br>G7.3F<br>G8.2C          |
| <b>G</b> Know and use properties of right-angled, isosceles, scalene and equilateral triangles                                                    |                                                                                             | G7.2E<br>G7.3A<br>G7.3F                   |
| <b>H</b> Solve geometric problems using side and angle properties of quadrilaterals and other polygons                                            | Calculate the size of the angle marked $x$<br><br>Give reasons for your answer              | G7.2E<br>G7.3F<br>G8.2D                   |
| <b>I</b> Identify alternate angles and know that they are equal                                                                                   |                                                                                             | G7.2E<br>G7.3F<br>G8.2E                   |

### 3.2 Angles *continued*

| Subject content                                                                                                   | Guidance                                             | Curriculum reference    |
|-------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|-------------------------|
| <b>J</b> Identify corresponding angles and know that they are equal                                               |                                                      | G7.2E<br>G7.3F<br>G8.2F |
| <b>K</b> Solve problems using angle properties of intersecting lines, parallel lines and polygons, giving reasons | Alternate, corresponding, vertically opposite angles | G7.2E<br>G7.3F<br>G8.2G |
| <b>L</b> Use a ruler and protractor to draw triangles accurately, including simple scale drawings                 | Given 2 sides and 1 angle, or 1 side and 2 angles    | G7.3E                   |
