

Topic 5: Micro-organisms

Students should:		Guidance
		<i>iPrimary Curriculum reference</i>
5.1	know the term <i>micro-organisms</i> and that these can be bacteria, viruses or microscopic fungi, for example yeasts	know that micro-organisms are so small a microscope is needed to see them recall the terms <i>bacterium/bacteria</i>, <i>fungus/fungi</i> and <i>virus</i> cellular detail and the differences between these micro-organisms are NOT required <i>Year 6: Micro-organisms</i>
5.2	know ways in which some micro-organisms can be useful and others can be harmful	useful: for example making bread, compost, cheese and yoghurt harmful: for example disease, food poisoning, food going mouldy. <i>Year 6: Micro-organisms</i>
5.3	know that micro-organisms growing and reproducing on food can cause food poisoning	<i>Year 6: Micro-organisms</i>
5.4	explain some simple food hygiene precautions to reduce the risk of food poisoning	for example hand washing, clean surfaces, methods of storage/refrigeration <i>Year 6: Micro-organisms</i>
5.5	understand the role of decomposers in food chains and the recycling of materials	understand that: • bacteria and fungi are involved in the process of decay • breaking down dead animals and plant material releases nutrients back to the soil. <i>Year 6: Micro-organisms</i>
