

Topic 2: Algebra

2.1 Sequences

Subject content	Guidance	Curriculum reference
A Find missing terms of a simple sequence	What would the next term be in this sequence? 1, 3, 5, 7, __	
B Generate terms of a sequence, given a term to term rule	Jon is writing a number sequence using the rule: <i>Double the previous number and add 2</i> What is the missing term? 2, 6, 14, __ , 62, ...	N6.8C
C Find the term-to-term rule of a given sequence	What rule has been used to generate this sequence of numbers? 3, 7, 10, 13, ...	N6.8C
D Use linear expressions to describe the n^{th} term of an arithmetic sequence	$3n + 1$ generates the sequence: 3, 7, 10, 13; what would the 100 th term be?	N6.8C
