

Learners will be expected to demonstrate skills as defined in the Art and Design core content section of this specification, in the context of their chosen area(s) of Photography. In addition learners will be required to demonstrate skills in all of the following:

- applying and using composition in Photography
- understanding and application of scale appropriate to the chosen work and direction relevant to learners' intentions
- understanding and applying formal elements such as colour, tone, texture, shape and form in relation to Photography

	• selecting, editing and highlighting photographic images • using appropriate visual language and terminology within Photography • manipulating imagery • understanding and using relevant conventions and genres in Photography
Knowledge and Understanding	Learners must use an appropriate range of processes and techniques using traditional and/or digital media, appropriate to the chosen subject area enabling research, exploration and the creation of the final outcome(s). Learners will build and evidence an understanding of: • relevant technologies, materials, processes and resources • continuity and change in different genres, styles and traditions relevant to Photography and the chosen areas of study within this specialism • how ideas, feelings and meanings can be conveyed and interpreted in images and artefacts • how images and artefacts relate to the time and place in which they were made and to their social and cultural context • a working vocabulary and specialist terminology which are relevant to their chosen area(s) of study.
