

2b. Content of AS Level in Chemistry B (Salters) (H033)

The AS Level in Chemistry B (Salters) specification content is divided into two sections (Section 2c and 2d). An overview of the context is provided at the start of each storyline in Section 2d along with a summary of the chemistry it contains. The assessable content is divided into two columns: **Learning outcomes** and **Additional guidance**.

The Learning outcomes in Sections 2c and 2d may all be assessed in the examinations. The Additional guidance column is included to provide further advice on delivery and the expected skills required from learners.

The details of the storyline contexts, where not directly related to the Learning outcomes, do not form part of the assessable content. These contexts are provided as a coherent and engaging teaching sequence, allowing

The specification has been designed to be co-teachable with the A Level in Chemistry B (Salters) qualification. Learners studying the A level study Section 2c and the first five teaching modules (in Section 2d), continuing with the content of the additional five teaching modules and Chemical literacy in year 13. The internally assessed Practical Endorsement skills also form part of the full A Level (see section 2c, 1.2 in the A level specification).

A summary of the content for the AS level course is as follows:

Section 2c – Development of practical skills in chemistry

- Practical skills assessed in a written examination
