

2b. Content of A Level in Chemistry B (Salters) (H433)

The A Level in Chemistry B (Salters) specification content is divided into three sections (Section 2c, 2d and 2e). An overview of the context is provided at the start of each storyline in Section 2d along with a summary of the chemistry it contains. The assessable content is divided into two columns: **Learning outcomes** and **Additional guidance**.

The Learning outcomes in Sections 2c, 2d and 2e may all be assessed in the examinations (with the exception of some of the skills in module **1.2** which will be assessed directly through the Practical Endorsement). The Additional guidance column is included to provide further advice on delivery and the expected skills required from learners.

The details of the storyline contexts, where not directly related to the Learning outcomes, do not form part of

qualification. Section 2c (1.1) and the first five teaching modules (in Section 2d) comprise the AS Level Chemistry B (Salters) course and learners studying the A level continue with the content of the additional five teaching modules and Section 2e (Chemical literacy). The internally assessed Practical Endorsement skills also form part of the full A Level (see Section 2c, 1.2).

A summary of the content for the A level course is as follows:

Section 2c – Development of practical skills in chemistry

- Practical skills assessed in a written examination
- Practical skills assessed in the practical endorsement
