

1.3 How can usability be considered when designing prototypes?

- | | |
|---|---|
| <p>a. Learners should be able to analyse and evaluate factors that may need consideration in relation to the user interaction of a design solution, including:</p> <ul style="list-style-type: none">i. the impact of a solution on a user's lifestyleii. the ease of use and inclusivity of productsiii. ergonomic considerations and anthropometric data to support ease of useiv. aesthetic considerations. |  |
| <p>b. Demonstrate an understanding of the ergonomic factors that may need considering when developing engineered products, including:</p> <ul style="list-style-type: none">i. anthropometric data to help define design parameters associated with the human bodyii. user comfort, layout of controls, software user-interface. |  |

2. Learning from existing products and practice
