

6.2 How do mechanisms provide functionality to products and systems?

- a. Demonstrate an understanding of the functions that mechanical devices offer to products, providing different types of motion, including:
- i. rotary
 - ii. linear
 - iii. reciprocating
 - iv. oscillating.
- b. Demonstrate an understanding of devices and systems that are used to change the magnitude and direction of forces and torques, including:
- i. gears, cams, pulleys and belts, levers, linkages, screw threads, worm drives, sprockets, chain drives and belt drives
 - ii. epicyclic gear systems
 - iii. bearings and lubrication
 - iv. efficiency in mechanical systems.
