

7.1 How can materials and processes be used to make iterative models?

- | | | |
|----|--|--|
| a. | Understand that 3D iterative models can be made from a range of materials and components to create block models and working prototypes to communicate and test ideas, moving parts and structural integrity. | |
| b. | Demonstrate an understanding of simple processes that can be used to model ideas using hand tools and digital tools, such as rapid prototyping, or digital simulation packages. | |
