

2.1 Why is it important to analyse and evaluate products as part of the design and manufacturing process?

- a. Analyse and evaluate the features and methods used in existing products and design solutions, to inform opportunities and constraints that may influence design decisions to offer product enhancement, including:
- i. the context of the existing product and the context of future design decisions
 - ii. the multiple materials and components used
 - iii. methods of construction and manufacture
 - iv. how functionality is achieved
 - v. the ease of use, including: ergonomic and anthropometric considerations
 - vi. inclusivity of products and appropriate considerations of application to a wide variety of users
 - vii. fitness for purpose
 - viii. the impact on user lifestyles
 - ix. the effect of trends, taste and/or style
 - x. the effect of marketing and branding
 - xi. the considerations of how to get a product to market.
