

**4.2 How do industry professionals use digital design tools to support and communicate the exploration, innovation and development of design ideas?**

- |    |                                                                                                                                                                                                                                                                                                                                                                                         |  |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| a. | Demonstrate an understanding of how designers develop products using digital tools and online collaboration, such as: <ul style="list-style-type: none"><li>• discussing and exchanging ideas with specialists</li><li>• developing designs concurrently with other designers</li><li>• explaining and communicating their design decisions to stakeholders.</li></ul>                  |  |
| b. | Demonstrate an understanding of how digital design software is used during design development, such as: <ul style="list-style-type: none"><li>• visual presentation, rendering and photo-quality imaging</li><li>• product simulation</li><li>• scientific analysis of real-world physical factors to determine whether a product will break or work the way it was intended.</li></ul> |  |
