

6.3 What opportunities are there through using smart and modern technologies within products?

- a. Demonstrate an understanding of how smart materials change the functionality of products, such as:
- colour changes, shape-shifting, motion control, self-cleaning and self-healing
 - smart materials used in medical procedures to act in a way that conventional materials and processes would not previously have permitted.

- b. Understand how modern technologies can support the function of products, such as:
- programmable components that can be built into a product and coded to respond to inputs that command an action.

7. Manufacturing processes and techniques
