

AL PRINCIPLES	8.2 How can product designers and manufacturers assess whether a design solution meets the criteria of technical specifications?	
	a. Demonstrate an understanding of the methods and importance of undertaken physical testing on a product to ensure it meets the criteria it is meant to fulfil, including: i. functionality ii. accuracy iii. performance.	
	b. Recognise how physical testing systems are integrated into the manufacturing process in the design industry to test functional feasibility, including: i. testing of materials for durability and aftercare ii. testing models and prototypes for performance and fitness for purpose iii. testing products in use through different methods, such as: - o consumer testing - o virtual testing.
