Key Features

- Unrivalled levels of support and advice.
- Web-based resources covering the units.
- Clear and appropriate progression routes from GCSE for all students.
- Flexibility in provision of Further Mathematics.
- User friendly and accessible.

This specification was devised by Mathematics in Education and Industry (MEI) and is administered by OCR.

Support and Advice

The specification is accompanied by a complete support package provided by MEI and OCR. The two organisations work closely together with MEI taking responsibility for the curriculum and teaching aspects of the course, and OCR the assessment.

- Advice is always available at the end of the telephone or by e-mail.
- One-day INSET courses provided by both MEI and OCR.
- The MEI annual three-day conference.
- MEI branch meetings.
- Regular newsletters from MEI.
- Specimen and past examination papers, mark schemes and examiners' reports.
- Coursework resource materials and exemplar marked tasks.

Web-based Support

The units in this specification are supported by a very large purpose-built website designed to help students and teachers.

Routes of Progression

This specification is designed to provide routes of progression through mathematics between GCSE and Higher Education and/or employment. It has the flexibility to meet the diverse needs of the wide variety of students needing mathematics at this level.

Further Mathematics

A feature of this specification is the flexibility that it allows teachers in delivering Further Mathematics. It is possible to teach this concurrently with AS and Advanced GCE Mathematics, starting both at the same time, or to teach the two courses sequentially, or some combination of the two.

User friendliness

This specification has been designed by teachers for students. Thus the accompanying text books, one for each unit, are accessible to students, easy to read and work from. The *Students' Handbook* provides a particularly helpful source of information.
