

4.4 FINAL CERTIFICATION

Each unit is given a grade and a Uniform Mark, using procedures laid down by Ofqual in the document *GCE A and AS Code of Practice*. The relationship between total Uniform Mark and subject grade follows the national scheme.

4.4.1 Certification of Mathematics

Candidates enter for three units of assessment at Advanced Subsidiary GCE. To complete the Advanced GCE candidates must enter a valid combination of six units.

To claim an award at the end of the course, candidates' unit results must be aggregated. This does not happen automatically and Centres must make separate 'certification entries'.

Candidates may request certification entries for:

- either Advanced Subsidiary GCE aggregation
- or Advanced Subsidiary GCE aggregation, bank the result, and complete the A2 assessment at a later date
- or Advanced GCE aggregation
- or Advanced Subsidiary GCE and Advanced GCE aggregation in the same series.

Candidates must enter the appropriate AS and A2 units to qualify for the full Advanced GCE award.
