

5.1 ASSUMED KNOWLEDGE

There is no formal prerequisite for a student wishing to embark on MEI Structured Mathematics.

The unit specifications are written with the same assumption about prior knowledge as that used for the subject criteria, that students embarking on AS and Advanced GCE study in Mathematics are expected to have achieved at least grade C in GCSE Mathematics, or its equivalent, and to have covered all the material in the Intermediate Tier*. Consequently everything which is in the National Curriculum up to and including that level is also implicit in this specification. In a number of cases such material is included in the specification for clarity and completeness and is indicated by an asterisk; such material will not form the focus of an examination question.

*This refers to the Intermediate tier of GCSE Mathematics at the time when the subject criteria were written. See the document *Assumed Knowledge for GCE Mathematics* on the Mathematics pages of the OCR website (www.ocr.org.uk) for more details.
