

5.3.3 Damping

Learning outcomes		Additional guidance
<i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i>		
(a)	free and forced oscillations	
(b)	(i) the effects of damping on an oscillatory system	HSW9, 12
	(ii) observe forced and damped oscillations for a range of systems	
(c)	resonance; natural frequency	HSW9, 12
(d)	amplitude-driving frequency graphs for forced oscillators	
(e)	practical examples of forced oscillations and resonance.	HSW9, 12
