

6.2.2 Coulomb's law

Learning outcomes	Additional guidance
<i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i>	
(a) Coulomb's law; $F = \frac{Qq}{4\pi\epsilon_0 r^2}$ for the force between two point charges	Learners will also require knowledge of section 3.2
(b) electric field strength $E = \frac{Q}{4\pi\epsilon_0 r^2}$ for a point charge	
(c) similarities and differences between the gravitational field of a point mass and the electric field of a point charge	Learners will also require knowledge of 5.4
(d) the concept of electric fields as being one of a number of forms of field giving rise to a force.	Learners will be expected to link this with 5.4
