

6.3.2 Motion of charged particles

Learning outcomes	Additional guidance
<i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i>	
(a) force on a charged particle travelling at right angles to a uniform magnetic field; $F = BQv$	Learners will also require knowledge of 3.2, 3.3 and 5.2 HSW1
(b) charged particles moving in a uniform magnetic field; circular orbits of charged particles in a uniform magnetic field	
(c) charged particles moving in a region occupied by both electric and magnetic fields; velocity selector.
