

6.2 Application areas in everyday life

- Energy Management
- Health
- Manufacturing
- Military / Emergency Services
- Smart devices
 - Business
 - Home
 - Personal
- Transport

To include:

- Know the purpose of the IoE applied to each application area
- Advantages and disadvantages of the IoE applied to each application area
- Assess the suitability of the use of the IoE for each application area
- The security issues related to the use of the IoE in each application area

The emergency services include:

- Ambulance
- Coastguard
- Fire Service
- Mountain Rescue
- Police

Assessment guidance

During the exam, students will be expected to demonstrate their understanding through questions that require the skills of analysis and evaluation in particular contexts.

This unit is assessed by an exam. Due to the Terminal Assessment requirement, the exam must be taken in the students' final assessment series. The exam is 1 hour and 30 minutes. It has two sections – Section A and Section B.

- Section A has 15 marks
- Section B has 55 marks
- The exam has 70 marks in total

This will be conducted under examination conditions. For more details refer to the [Administration](#) area.

The Cambridge National in IT '[Exploring our exams: a guide to our sample assessment material](#)' gives more information about the layout and expectations of the exam.

A range of question types will be used in the exam, but it will always require students to use the skills of analysis and evaluation.

Section A

- This will have a range of closed response, multiple choice and short response questions.

Section B

- This will have scenario based questions.
- Students will be presented with a short scenario which builds throughout Section B.
- Students will apply their knowledge and understanding of IT concepts to produce relevant responses.
- Students must make appropriate recommendations for the short scenario provided throughout Section B. These recommendations may relate to any of the topic areas in unit R050.
- Students will hand-draw/sketch their visual solution to a problem e.g. mind map, flowchart, visualisation diagram. This will be worth 8 marks.
- The extended response question is worth 9 marks. This will be assessed using a level of response mark scheme.

Synoptic assessment

This unit allows students to gain underpinning knowledge and understanding relevant to the qualification and sector. The NEA units draw on and strengthen this learning with students applying their

learning in a practical, skills-based way. The synoptic grids at the end of the NEA units show these synoptic links.

More information about synoptic assessment within this qualification can be found in [section 5.2 synoptic assessment](#).
