

Topic Area 4: Evaluating the spreadsheet solution

Teaching content

Exemplification

4.1 Methods used to evaluate the success of the spreadsheet solution

- ☐ Client requirements
- ☐ HCI design principles and conventions

To include:

- How suitable the spreadsheet solution is for the requirements of a client
- How effectively the visual style has been generated
- Has house style been followed
- Whether the planned spreadsheet solution has been created
- How the navigation system has successfully met the client's requirements

Does not include:

- User feedback / focus group review / user testing / user acceptance testing

Marking criteria

[Section 6.4](#) provides full information on how to mark the NEA units and apply the marking criteria. The marking criteria descriptor words are further explained in [Appendix B](#).

The tables below contain the marking criteria for the tasks for this unit. If a student's work does not meet any Mark Band 1 (MB1) criteria for the task, you must award zero marks for that task.

Unit R060 – Topic Area 1: Planning and designing the spreadsheet solution		
MB1: 1–3 marks	MB2: 4–6 marks	MB3: 7–10 marks
Limited use of design tools and features used to plan the solution, which are under-utilised for the intended purpose	Adequate use of design tools and features used to plan the solution, which are mostly utilised for the intended purpose	Effective use of design tools and features used to plan the solution, which are fully utilised for the intended purpose
MB1: 1–4 marks	MB2: 5–8 marks	MB3: 9–13 marks
Limited functional design of spreadsheet solution	Adequate functional design of spreadsheet solution	Effective functional design of spreadsheet solution
Limited design of system output(s) produced	Adequate design of system output(s) produced	Effective design of system outputs produced
Limited design of Human Computer Interface	Adequate design of Human Computer Interface	Effective design of Human Computer Interface

Unit R060 – Topic Area 2: Creating the spreadsheet solution		
MB1: 1–3 marks	MB2: 4–6 marks	MB3: 7–10 marks
Limited use of tools and techniques used to create the solution which are under-utilised for the intended purpose	Adequate use of tools and techniques used to create the solution which are mostly utilised for the intended purpose	Effective use of tools and techniques used to create the solution which are fully utilised for the intended purpose
MB1: 1–4 marks	MB2: 5–8 marks	MB3: 9–13 marks
The solution allows limited interaction between user and spreadsheet to meet the needs of the scenario	The solution allows adequate interaction between the user and spreadsheet to meet the needs of the scenario	The solution allows effective interaction between the user and spreadsheet to fully meet the needs of the scenario
The solution contains inefficient processes that affects the accuracy and quality of the data produced	The solution contains some inefficiencies , but these do not affect the accuracy and quality of the data produced	The solution contains efficient processes that generates accurate and high-quality data
The information presented is limited in relevance and accuracy	The information presented is partly relevant and clear, but is open to misinterpretation	The information presented is fully relevant to the scenario needs and clear in its message

	Data integrity is preserved using a limited range (one or two) tools and techniques Future predictions are partially generated using the solution developed	Data integrity is preserved using a range of tools and techniques. Future predictions are fully generated using the solution developed
--	---	--

Unit R060 – Topic Area 3: Testing the spreadsheet solution

MB1: 1–2 marks	MB2: 3–4 marks	MB3: 5–7 marks
Limited technical and/or usability testing undertaken	Adequate technical and usability testing undertaken with results partly documented	Effective technical and usability testing undertaken with results thoroughly documented

Unit R060 – Topic Area 4: Evaluating the spreadsheet solution

MB1: 1–2 marks	MB2: 3–4 marks	MB3: 5–7 marks
Basic evaluation which states which parts of the solution meet the client requirements Basic evaluation which states which parts of the Human Computer Interface worked well/did not work well	Adequate evaluation which describes the effectiveness of the solution to meet the client requirements Adequate evaluation which describes the effectiveness of the Human Computer Interface to meet the client requirements	Comprehensive evaluation which explains the effectiveness of the solution to meet the client requirements Comprehensive evaluation which explains the effectiveness of the Human Computer Interface to meet the client requirements

Assessment guidance

During the NEA, students will be expected to demonstrate their skills and understanding through 3 to 5 tasks in the set assignment. Students are required to plan and design, create, test and review the spreadsheet solution for the particular context. Students are expected to complete the assignment independently therefore it is highly unlikely that the same spreadsheet solution is created by all students. It is essential students have access to spreadsheet software to complete the assessment.
