

3.1 Tools and techniques of imaging editing software used to create digital graphics

Software tools and techniques used to create digital graphics

- Image/canvas size
- Layout tools
- Drawing tools
- Adjustments to brightness/contrast and colour
- Use of selections
- Use of layers and layer styles
- Retouching
- Typography
- Filters and effects

Examples of tools and techniques used to create digital graphics may include:

- Setting the canvas size - expanding or modifying
- Using layout tools to help the placement of assets e.g. grids, guides and rulers
- Using drawing tools e.g. shapes, colour fill, gradients
- Using brightness and contrast, levels, colour balance, hue, saturation
- Using selections based on shape, colour or edge contrast
- Using layers to structure a graphic, create, merge, rename, change opacity
- Using layer styles to enhance the visual impact e.g. drop shadows, effects, textures
- Using retouching techniques to remove unwanted elements e.g. cloning, healing, blur, colour swatches, colour picker, pencil, brush
- Using typography to add information e.g. text, font styles, sizes and effects
- Using filters and effects to enhance the visual appeal e.g. stylise, monochrome, colour toning, vignette, sharpen

Does not include:

- Using masks, customisation of tools
