

2.2 Technical skills to create comics

Techniques for combining assets into comic panels

- Panel layouts
- Typographical styles
- Graphical assets
- Focal points
- Story flow

Techniques and skills to transfer a script, storyline or storyboard into a comic strip

- Integrating the script/story flow using
 - speech bubbles
 - thought bubbles
 - narration and captions

To include:

- Using generic and specific comic creation software to
 - create suitable panel layouts on single and multiple pages to support story flow
 - create suitable typographical style
 - insert graphical assets into panels
 - establish focal points within panels by cropping, zooming in or out or adding auto-shapes

To include:

- Using elements of scripts/storylines/storyboards to create comics
 - stage directions become visuals (images) or onomatopoeia
 - thoughts and dialogue become thought or speech bubbles
 - stage directions for change of setting or scene become captions on new panels
