

Topic Area 1: Plan animation with audio

Teaching content

Exemplification

1.1 Features and conventions of animation and audio

Types and methods of animation and their distinguishing features

- Stop motion/claymation
- Time-lapse
- Motion capture
- Computer generated (CGI)
- Cel animation
- Cut out
- Flipbook animation

The properties and features of audio

- Types of audio
 - music
 - narration/voiceover
 - diegetic and non-diegetic sounds
 - foley/SFX
 - dialogue
- The properties of digital audio
 - bit depth
 - sample rate
 - gain (volume)
 - mono/stereo

To include:

- Differences between types of animation and the methods used to create them
- When and where different types of animation are used

Does not include:

- The hardware/server/processing/rendering capacity required to generate HD CGI for the movie industry

To include:

- The definitions of, and differences between, audio types
- Which types of sounds are used when and for what purpose(s)
- How background sounds, sound effects and music are used to enhance the main audio content of sequences
- The importance of technical properties in ensuring clarity/audibility and separation between sounds

Does not include:

- Commercial/chart music production as a sector, song writing

Unit R096: Animation with audio

The purpose and conventions of animations

- ☐ Advertising/promotion
- ☐ Storytelling/narrative
- ☐ Information

Conventions used in audio to meet a purpose

- ☐ Mood/emotion
- ☐ Scene setting
- ☐ Structure of audio products
- ☐ Timing and synchronisation with visuals

Creativity in animation with audio

- ☐ Originality
- ☐ Imaginative design
- ☐ Derivative design

To include:

- How narratives are structured using the three-part story structure
- Application of conventions of advertisements e.g. 'hook', 'sting', slogan
- Using information, product branding or brand/product recognition
- Using shot types and camera angles to convey meaning e.g. power structures, passage of time, movement, change of focus or emphasis

To include:

- Using humour, breaking with expectations/the norm or shock tactics to help make an animation's key message memorable and effective
- Using foley and sound effects to enhance movement and support visuals
- Using dialogue for animated characters and voiceover/narration
- Using voice pace/timbre/pitch/accent to convey character types and tropes
- Using diegetic and non-diegetic sound
- Using tempo, style of music and choice of instrumentation to enhance mood/emotive content
- Using stings and jingles to create impact and engagement

To include:

- How original work differs from adaptations to existing designs
- How imaginative work can be derivative
- How to balance following conventions with originality/imagination to produce creative products
