

2.1.2 Designing, creating and refining algorithms

- ☐ Identify the inputs, processes, and outputs for a problem
- ☐ Structure diagrams
- ☐ Create, interpret, correct, complete, and refine algorithms using:
 - Pseudocode
 - Flowcharts
 - Reference language/high-level programming language
- ☐ Identify common errors
- ☐ Trace tables

Required

- ✓ Produce simple diagrams to show:
 - The structure of a problem
 - Subsections and their links to other subsections
- ✓ Complete, write or refine an algorithm using the techniques listed
- ✓ Identify syntax/logic errors in code and suggest fixes
- ✓ Create and use trace tables to follow an algorithm
- ✓ Use of nesting for selection and iteration

Flowchart symbols

	Line		Input/ Output
	Process		Decision
	Sub program		Terminal
