

2.3.1 Defensive design

☐ Defensive design considerations:

- Anticipating misuse
- Authentication

☐ Input validation

☐ Maintainability:

- Use of sub programs
- Naming conventions
- Indentation
- Commenting

Required

- ✓ Understanding of the issues a programmer should consider to ensure that a program caters for all likely input values
- ✓ Understanding of how to deal with invalid data in a program
- ✓ Authentication to confirm the identity of a user
- ✓ Practical experience of designing input validation and simple authentication (e.g. username and password)
- ✓ Understand why commenting is useful and apply this appropriately
