

2.2 People of the Planet

Historically, the world has developed unevenly. This theme explores the causes of this uneven development and the differences between countries. A country case study focuses on a number of interrelated factors affecting its economic development. Learners need to understand the causes and consequences of growth in

urban areas, particularly related to the process of rapid urbanisation. Learners investigate a city in a low-income developing country (LIDC) or emerging and developing country (EDC) to examine its people and culture, and consider the influence they have on shaping the cities distinct ways of life and challenges.

Section	Key Ideas	Content	Scale
2.2.1	The world is developing unevenly.	- Social, economic and environmental definitions of development, including the concept of sustainable development. - Different development indicators, including GNI per capita, Human Development Index and Internet Users, and the advantages and disadvantages of these indicators. - How development indicators illustrate the consequences of uneven development. - Current patterns of advanced countries (ACs), emerging and developing countries (EDCs) and low-income developing countries (LIDCs).	G
2.2.2	There are many causes of uneven development.	- Outline the reasons for uneven development, including the impact of colonialism on trade and the exploitation of natural resources. - Different types of aid and their role in both promoting and hindering development.	G, R
2.2.3	Many factors contribute to a country's economic development.	Case study of one LIDC or EDC. This should illustrate its changing economic development, including the influence of and interrelationships between: - the country's geographical location, and environmental context (landscape, climate, ecosystems, availability and type of natural resources) - the country's political development and relationships with other states - principal imports and exports and the relative importance of trade - the role of international investment - population and employment structure changes over time - social factors, including access to education and healthcare provision - technological developments, such as communications technology - one aid project. - Using the case study of the LIDC or EDC explore Rostow's model to determine the country's path of economic development.	G, R, N, L
